FLOORS**

Tips for **PERIODIC CLEANING OF FLOORS**

In periodic cleaning the stubborn dirt and any protective agents are removed from the surface. The most common methods are surface cleaning and polish removing, which here means thorough removal of protective and care agents by machine methods.

A clean floor is protected or treated according to the instructions given for the floor material. Well-maintained floors maintain a beautiful appearance for a long time and create a comfortable space as well as facilitate cleaning.

STEP 1:
PLAN THE WORK

STEP 2:
**MOVE FURNITURE
AND CLEAR THE
FLOOR FROM DIRT**

STEP 3:
REMOVE OLD POLISH

STEP 4:
POLISH THE FLOOR

Floor polish removal

STEP 1:

PLAN THE WORK

Clear the area and identify the surface material. Depending on the floor material, choose suitable polish remover and the color of the pad.

STEP 2:

CHOOSE THE RIGHT MACHINE AND EQUIPMENT

Do polish removal with a single-disc machine and a pad in good condition. Remove the solution with a wet vacuum cleaner carefully.

STEP 3:

CAREFULLY CLEAN THE AREA

If the polish remover is rinse-free, a moist mopping of the floor is sufficient. If the remover demands rinsing, apply clean water on the floor and vacuum the floor with a wet vacuum cleaners.

PRO TIP FOR POLISH REMOVAL

Before starting the floor polish removal the most important thing is to identify the floor material. This prevents damaging the floor by making sure to use the correct products.

Give the floor the time needed for drying up before applying the new floor polish.

Kiilto Linoli

A polish remover agent for linoleum, rinse-free with a mild odor. *Product code: T7048.005, 3 x 5 l*

Kiilto Base Total

A very effective polish remover agent for alkaline resistant surfaces. Requires careful rinsing, mild odor. *Product code: 41085, 3 x 5 l*

A polish remover for alkaline resistant surfaces, rinse-free. Non-perfumed.

Product codes: 41075, 3 x 5 l / 41071, 6 x 1 l

Polishing

BE SURE THE FLOOR IS CLEAN

The surface needs to be clean and completely dry before applying the polish. Select the polish according to desired gloss level.

WORK SYSTEMATICALLY

Make sure to apply the same amount of the polish all around on the surface.

PRO TIP FOR POLISHING

Reserve time! To ensure the beautiful result, apply the polish in thin layers and apply the new layer only when the previous layer is dry.
